THE FOLLOWING IS AN EXPLANATION OF YOUR MEDICARE COVERAGE:

We accept assignment of covered fees, provided you are fully eligible for coverage and have already met your yearly deductible. THE EYE HEALTH PORTION OF YOUR EYE EXAMINATION IS COVERED; however, the prescription analysis (REFRACTION) portion of your exam is NOT COVERED, nor is any portion of your prescription eye wear and/or contact lens fees. As a special service, our office will submit all applicable fees. You will be responsible for any fees that Medicare does not cover.

HOW IT WORKS:

Our office is required by law to bill Medicare our customary fees. Medicare, however, will assign each submitted fee an allowable amount. These allowable amounts are typically lower than our customary fees. Provided you have met your yearly deductible, Medicare will reimburse our office "ONLY 80%" of each allowable amount covered. Our office is then required by law to bill you the difference between the allowable amounts and the reimbursed amounts, plus any remaining balance of uncovered fees. After your examination, if there is a remaining balance or adjustment, you may receive a final statement from our office reflecting the above transactions.
