

Optomap consent Form

Retinal Imaging consent

Patient First Name:	
Patient Last Name:	
Birth Date:	
Optomap Retinal Imaging Your examination today will utilize new digital retinal imaging technology, called Optomap. Optomap images are instantly evaluated by the doctor and reviewed with our patients during the exam. Optomap imaging is unique in that it images virtually the entire retina without the use of dilating eye drops. Images are stored permanently and used to compare with future images of your retina in subsequent exams	
For patients with known conditions such as diabetes, high blood pressure, stroke, or other systemic conditions, our standard procedure will include an examination and Optomap evaluation. Our doctors would like for all their patients to have an Optomap exam annually.	
The Optomap imaging costs \$39. Insurance does not cover this imaging.	
If you decline the Optomap exam, you are limiting our ability to accurately determine the health of your eyes.
